

Wealth Manager Global Moderate Aggressive Wrap (USD)

As of 2020/04/30

Investment Manager: Jonathan Moodie
Investment Consulting: Glacier Discretionary Fund Management
Benchmark: Global MA High Equity
Inception Date: 01 April 2017
Wrap Fund Fees: 50bps per annum (the fee excludes underlying Collective Investment Fees)

Mandate Description

The portfolio aims to provide long-term capital growth and is suitable for investors who are prepared to tolerate moderate to high fluctuations in their investment over the short term and require no income. The fund will be diversified across all major asset classes with a minimum of 80% of these assets being offshore. Investors in this fund have an investment horizon of 5-7 years. The portfolio is not Regulation 28 compliant.

Quarterly Comments

South Africa ended 2019 in recession as GDP declined 1.4% in Q4. The market expected a decrease of 0.1% following the 0.8% decline in Q3. This was a result of the rolling blackouts which impacted seven out of ten industries. Transport, storage & communication decreased 7.2%, trade, catering and accommodation contracted 3.8%, forestry and fishing dropped 7.6% and construction declined 5.9%. Business confidence reached a record low of 20, the lowest level in over two decades. The coronavirus pandemic has spread and SA has been downgraded to junk status by Moody's. Things have not been this bleak since the 2008 global financial crisis.

The SA market plunged in Q1. The All Share lost 21.38% as concerns grew over the impact of the coronavirus pandemic on our already struggling economy. The sell-off was led by mid- and small-cap counters, which shed 35.57% and 32.55%. Large-caps returned -19.17%. Financials was the worst-performing sector returning -39.48%, followed by Resources which declined 25.27%. SA Industrials (including dual listed companies) lost 8.44%.

The SARB cut the repo rate by 100bps in March, after a 25bps cut earlier this year, in response to the impact of the outbreak and spread of Covid-19 on our struggling economy. Inflation remained well within the central bank's target band, increasing to 4.6%. The cost of food and non-alcoholic beverages rose the most while transport costs slowed. The rand weakened 27.52% against the US dollar, 19.37% against the British pound and 25.65% against the euro.

Locally, bond markets delivered dismal returns. The ALBI returned -8.72% while inflation-linked instruments shed 16.82%. The best-performing fixed income asset class was in the short-end of the yield curve (1-3 years) which delivered 1.22%. Cash (STeFI) returned 1.69%. Preference shares lost 30.41%. Property was the worst performer shedding 48.07%.

Global markets fell sharply in base-currency terms as the coronavirus spread as investors sought perceived 'safe-haven' assets. Returns in rand terms were mixed as the rand weakened against major currencies.

Emerging market equities lagged developed market counterparts as sentiment towards EMs turned negative and the greenback strengthened. Emerging market equities lost -23.87% in USD (-2.92% in rand) and developed market equities shed 21.44% in USD (gaining 0.18% in rand). The Fed cut interest rates by 100bps to 0-0.25%, its second cut this year, it also announced unlimited quantitative easing to insulate the economy against a severe economic downturn caused by Covid-19. The ECB kept interest rates unchanged at 0% and launched a €750billion quantitative easing program to counter the risks posed by Covid-19. The Bank of England cut rates twice this year, reaching an all-time low of 0.1%, to cushion the economy in response to Covid-19.
